

I have worked in data engineering, AI engineering, and data science in both **R&D** and **consulting** settings. My experience spans end-to-end AI/ML workflows and building cloud-based data solutions. I enjoy exploring new technologies and maintaining well-structured technical documentation.

CERTIFICATIONS

AWS Machine Learning Specialty 2025 — 2028	AWS Solutions Architect Associate 2024 — 2027	AWS AI Practitioner 2025 — 2028	AWS AI Practitioner Early Adopter 2025 — 2028

TECHNICAL EXPERIENCE

Data & AI Engineer / Howlet 06/2023 — Present
Goaltech *Ankara, Türkiye*

- Developed an AI-based stock trading platform that utilizes **LLMs for financial news analysis** and trade decision-making.
- Analyzed the impact of breaking and historical financial news on stock prices using LLMs.
- Engineered **feature extraction methods** from news data to assess market signals and optimize buy/sell decisions.
- Developed real-time stock price prediction models by integrating **Recurrent Neural Networks (RNNs)** with **Large Language Models (LLMs)**.

Consultant AI Engineer / Central Bank of the Republic of Türkiye 07/2025 — 09/2025
Goaltech *Ankara, Türkiye*

- Developed a **proof-of-concept conversational analytics assistant** over the Bank’s EVDS statistical datasets: the chatbot turns plain-language questions into EVDS queries, analyzes results, and returns clear summaries, explanations, and auto-generated charts.
- Delivered GenAI enablement:** taught generative AI fundamentals and AWS services, with a detailed, hands-on deep dive into Amazon Bedrock.
- Built the project from scratch and guided the team end-to-end through architecture, implementation, and usage—combining theoretical instruction with practical workshops and live walkthroughs.

Consultant AI Engineer / Doping Hafıza 04/2025 — 07/2025
Goaltech *İstanbul, Türkiye*

- Built and deployed a technical support chatbot that reduced open support tickets by **60%**.
- Developed an AI assistant that guides students during lecture videos by directing them to the relevant topic or timestamp.
- Implemented a system that transcribes lecture videos, including whiteboard drawings, using vision-based models.
- Created an automated pipeline that generates structured lecture materials from video transcripts.

Consultant Data Engineer / Drax BECCS Carbon Negative 05/2024 — 08/2024
Goaltech *London, UK*

- Engineered real-time data pipelines to support AI model training, ensuring efficient data extraction, transformation, and storage.
- Optimized Big Data infrastructure, improving storage efficiency by 25% and increasing data flow velocity.
- Ingested geospatial data in multiple formats (CSV, GeoJSON, binary) into AWS S3 and loaded it into Databricks.
- Developed ETL pipelines using AWS Glue and PySpark to transform, cleanse, and validate geospatial data.

SKILLS

AI/ML	LangChain, LangGraph, AWS Bedrock, Neo4j, RAG, Knowledge Bases, LLM, ChatGPT, Ollama, Mistral, Gemini, Qwen, Deepseek, Embedding Models, MCP, Tools, Prompt Management, Fine-tuning, Parameter Efficient Fine-Tuning (PEFT), Vector DB, RAG, Multi-Agent Architectures, N8N, PyTorch, Keras, TensorFlow, AWS SageMaker, Python, Reinforcement Learning, DQN
Data Manipulation	Web scraping, Real-time data analysis, ETL, workflows, Spark, Kafka, Airflow, NiFi
Database	ElasticSearch, Kibana, MongoDB, InfluxDB, PostgreSQL
App	React, React Native, Expo, FastAPI
Design	LaTeX, Markdown, Draw.io, Architectural Diagram Design, Agile Methodology and Scrum-based project management

EDUCATION

Bachelor of Science in Computer Engineering, Hacettepe University, 3.39/4.00 2019 — 2024
IELTS: 7.5/9
